| Real Yummy Lamb and Rice Recipe Complete Adult Dog Food is formulated to meet the nutritional levels established by the AAFCO Dog Food Nutrient Profiles for maintenance. |            |         |

- 1 The formatting of the box was updated to enhance transparency, more closely align with human food labeling, and improve understanding by the consumer.
- 2 Calorie content is broken down into calories from protein, fat, and carbohydrate. In order to achieve or maintain a healthy body weight for your pet, it is important to understand the total number of calories, or "energy," your pet gets from different sources (protein, fat, and carbohydrate) in a serving of food.
- 3 Nutrients are guaranteed using common household measurements, like 8oz measuring cup, weight in grams (one ounce is about 30 grams), or per can, pouch, or other easily defined amounts.
- 4 Total carbohydrate and dietary fiber guarantees replace the crude fiber guarantee. Dietary fiber is a better measure of fiber.
- 5 The Nutritional Adequacy Statement is required to appear at the bottom of the Nutrition Facts box for consistent location across all products.
