# Enhanced Supplementary Leverage Ratio (eSLR)

The proposal would recalibrate the leverage buffer standard and use it consistently as a buffer across various requirements.

| CURRENT eSLR FOR GSIBS | 2018 eSLR PROPOSAL | 2025 eSLR PROPOSAL | TLAC | LTD |
|---|---|---|---|---|

**CURRENT eSLR FOR GSIBS**

Uniform 2% eSLR would be replaced

MAINTAIN 3% SLR

**2018 eSLR PROPOSAL**

The "leverage buffer standard" would have been the greater of 50% of the Method 1 or Method 2 surcharge

(Method 2 surcharge is usually greater)

METHOD 1 SURCHARGE — 50%

METHOD 2 SURCHARGE — 50%

MAINTAIN 3% SLR

**2025 eSLR PROPOSAL**

The new "leverage buffer standard" would be 50% of the Method 1 surcharge (which is usually less than the calculation of 50% of the Method 2 surcharge)

LEVERAGE BUFFER STANDARD

MAINTAIN 3% SLR

**TLAC**

Uniform 2% TLAC buffer would be replaced

LEVERAGE BUFFER STANDARD

MAINTAIN 7.5% LEVERAGE-BASED TLAC REQUIREMENT

**LTD**

Uniform 2% TLAC buffer would be replaced

LEVERAGE BUFFER STANDARD

MAINTAIN 4.5% ELIGIBLE LTD OF TOTAL LEVERAGE EXPOSURE

# The proposal would also use the same buffer for Covered IDIs.

**2025 eSLR PROPOSAL**

Uniform 6% eSLR
would be replaced

**LEVERAGE BUFFER STANDARD**

Covered IDIs would use the
same leverage buffer that
applies to the GSIB

**MAINTAIN 3% SLR**
