

Confidential Risk Assessment

A trusted advisor can help you size up your data security risks.

Risk assessments allow your organization to better understand its data security risks. Risk assessments facilitate making informed decisions and the prioritization of necessary security efforts. A proper risk assessment is the cornerstone of successful data security programs and is legally required for many organizations. We offer a targeted assessment based on the NIST 800-30 specification that is designed to be protected by the attorney-client privilege to the fullest extent permitted by law.

Davis Wright Tremaine Can Help

Our team of experienced privacy and data security attorneys can help you implement a repeatable risk assessment that is targeted to the data security laws relevant to your organization. We offer a fixed fee and tiered model that allows us to offer a customized **Confidential Risk Assessment** with a predictable budget.
